Application and Benefits

HumidiPRO offers homeowners convenience and control with automatic and manual control options as well as optional advanced features such as expandable range stops and dehumidification.

HumidiPRO automatically adjusts humidity to protect windows from condensation in cold weather and can shut off humidification based on a preset outdoor high temperature limit (up to 90 °F). The homeowner can set HumidiPRO once at the beginning of a season and forget it. If needed, the homeowner can use the humidity boost feature to temporarily raise the humidity by 5% or 10%.
